

Hot tub

Please shower before use.

Please rinse out your bathing costume with plain water indoors (or shower in it) Residue of washing powder in bathing costumes causes unpleasant foam build up in the tub.

No users with spray tan or body oils please these damage the filters permanently!

- DO NOT SIT OR CLIMB ON THE HOT TUB COVER THIS WILL CAUSE DAMAGE
- CHILDREN MUST ONLY USE THE HOT TUB WITH SUPERVISION
- CHILDREN ARE MORE SENSITIVE TO HEAT LOWER THE TEMPERATURE FOR YOUNGER CHILDREN AND RESTRICT THE LENGTH OF TIME SPENT IN THE TUB
- REMIND CHILDREN THAT WET SURFACES ARE SLIPPY TAKE CARE ENTERING AND GETTING OUT
- DO NOT USE THE HOT TUB IF YOU ARE PREGNANT Sitting in **hot** water **can** easily raise the body temperature, which **can** cause health issues for **you** and **your** developing baby.

Getting in

1. To Lift lid off:
 - a. Undo the black plastic buckle clips by the field side fence rails
 - b. Take hold of the lid by the top or handle on the field end (not by the skirt) and fold back towards the lid black metal frame
 - c. Fold the second half over to the side of the hot tub using the black handle
2. Test the temperature of the water with your hand – it should feel warm
3. Select power jet level with touch button once for low or twice for high
4. Turn on the jet power dial if wanted (LH Big dial)
5. Turn on the light if you want to at night (it's not effective during the day but great at night)
6. **NB the water fountain dial on the right is not working please do not use.**
7. PLEASE DO NOT SIT ON THE FILTER COMPARTMENT (The filter basket floats)

Drinks?

Please use the acrylic champagne glasses and tumblers for hot tub drinkies PTO

Getting out

1. Turn power dial **completely off**. This is crucial to keep energy costs low
2. Turn off the jet touch button
3. Switch off the light
4. Use the black hot tub lid handle to lift the lid onto the tub
5. Put your hand in between the top and bottom of the lid to flip and fold back to centre (do not lift by the skirt) **Please put the cover back on even if you are just popping in for a while.**
6. Close the lid and fasten the buckles
7. Make sure the skirt is not tucked up anywhere for a good heat seal

Hot tub testing

We come to test the hot tub once a day to check and adjust chemical levels. If we do need to add chemicals the hot tub cannot be used for 20 minutes. We endeavour to do the testing while you are out. This isn't always possible so if we need to come to do it while you are in we will text you before coming to test and treat the tub. **If the water is cloudy don't get in** and please let us know ASAP

When not in use you will hear the hot tub operate a filter cycle once every 12 hours to keep the water clean.

Limits on use

The tub takes 8 hours to heat so together with cleaning time may not be up to temperature and ready to use until 8 or 9 pm on the first day of your stay.

We want everyone to have a relaxing stay and to enjoy the hot tub along with all the facilities. In the interests of health and hygiene **the official maximum recommended time to spend in the tub is no more than 20 minutes in any one session.** We recognise the hot tub is a major attraction for some guests. **We suggest a limit of 1 hour per session and no more than 3 sessions a day in the interests of hygiene and also of the environment.** Prolonged use above this limit is likely to cause clouding of the water and will require further chemical treatment in addition to our normal daily treatment. It may not be possible to restore the correct balance of the water during your stay if the tub is used significantly above the official recommended time limit.

On the morning of your departure the hot tub is not available for use from 8am as we need to pop and add tub pipe cleaner so that it is ready to empty and clean out on your departure ready for the next guests.
